

METROPOLITAN TRANSPORTATION PLAN

We want your input on Southeast Missouri's first regional, long-range transportation plan! The Southeast Metropolitan Planning Organization (SEMPO) is hosting two public input sessions on the 2016-2040 Metropolitan Transportation Plan (MTP). This plan was prepared in cooperation with stakeholders representing various modes of transportation. It contains recommendations for future transportation improvements and identifies both funded and unfunded projects and programs. The public input sessions will be open house style to encourage dialogue. Don't miss this opportunity to help shape the future of transportation in Southeast Missouri!

Public Input Sessions

Thursday, September 24, 2015
